Projects

Apex CRM | *Laravel, filament, php*

- The application streamlines customer interactions and improves business relationships, enhancing customer retention and driving sales growth: <https://github.com/AbrahamKiplagat/Apex-crm> .
- Efficient handling of customer information including contact details, interaction history, and preferences
- Assigning and tracking tasks to ensure timely follow-ups and improved productivity
- Secure access control with multiple user roles ensuring data integrity and confidentiality

Hotel Management System | *Flutter(dart), Firebase,*

- Developed a comprehensive Hotel Booking application to showcase proficiency in Flutter and Dart for the frontend and Firebase for the backend as a service.
- The app allows users to search for hotels, view details, and make bookings seamlessly.
- Achieved high code quality and maintainability through effective use of state management and modular design. <https://github.com/AbrahamKiplagat/Hotel>

News Website | *React.js Mongo db Node.js Express.js*

- The website aggregates news articles from various sources and displays them in a user-friendly format.
- Users can search for specific news articles and filter them by categories such as sports, technology, and politics.
- Delivered a fully functional and visually appealing news website, enhancing user engagement. <https://github.com/AbrahamKiplagat/News-Website>
